## Exploring Occupation-Based Practice Across Practice Settings: Intellectual and Developmental Disabilities

- Are you a licensed Occupational Therapy practitioner with at least 6 months of clinical experience?
- Do you work in a residential setting for people with intellectual and developmental disabilities?

### Study Purpose and Overview

Join the Division of Occupational Science and Occupational Therapy in a research study aimed to identify and describe occupation-based practice within residential settings serving people with IDD. The study will consist of two 60-90 minutes focus groups via Zoom. Compensation provided.
